

The Delivery Visibility Crisis

No assignment records create
confusion and disputes

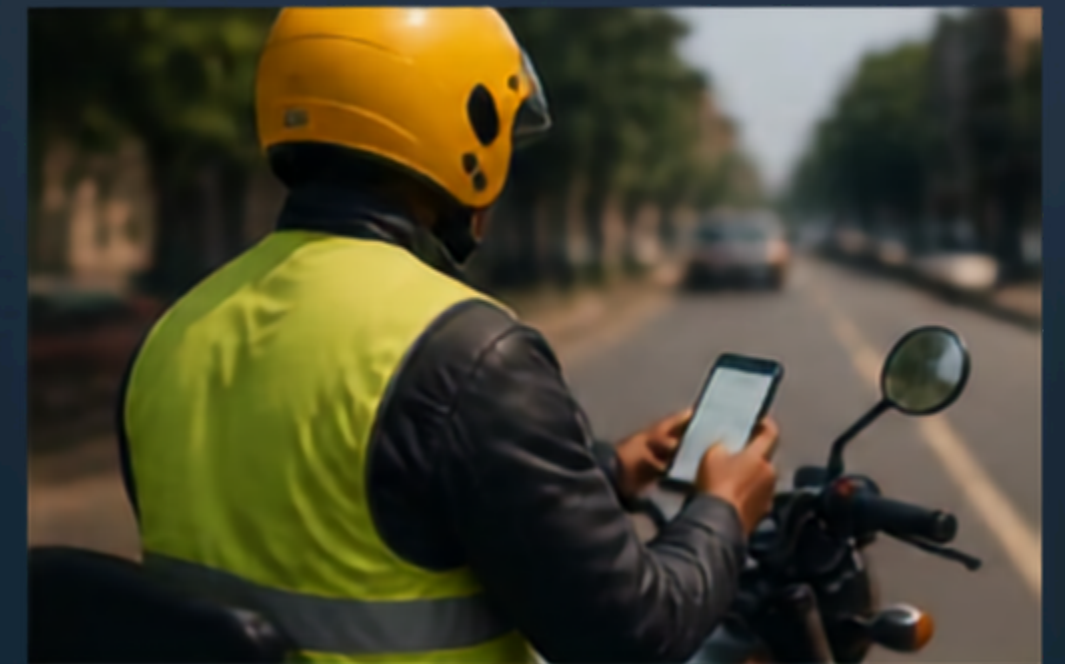

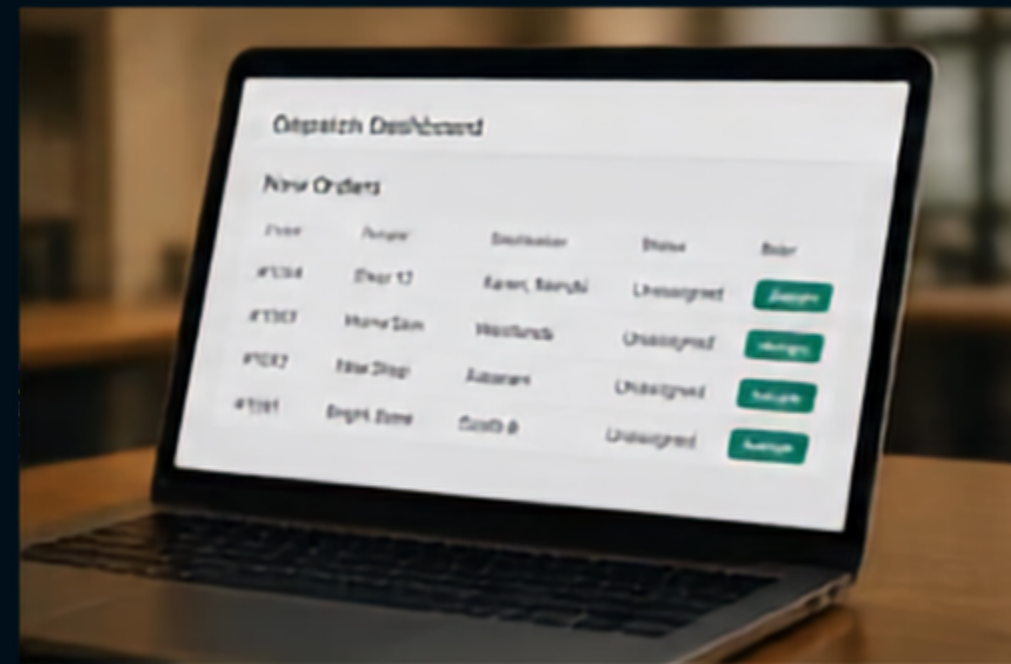

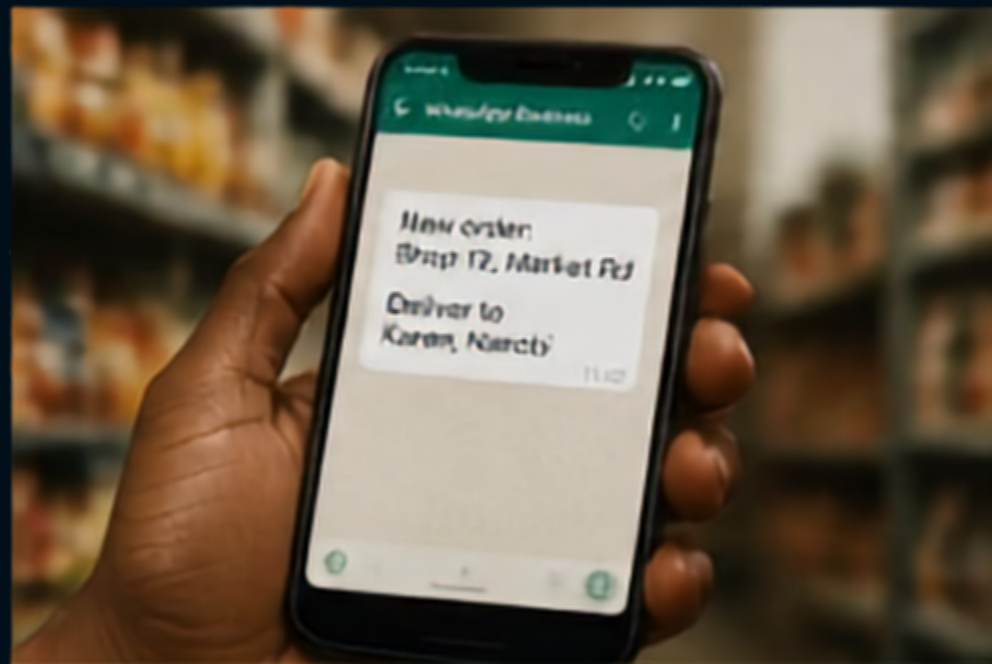

Zero visibility on delivery status
frustrates customers

No proof of delivery risks lost
orders and broken trust

Bringing Order to the Chaos

Reflex restores control and transparency with a simple 3-step process.

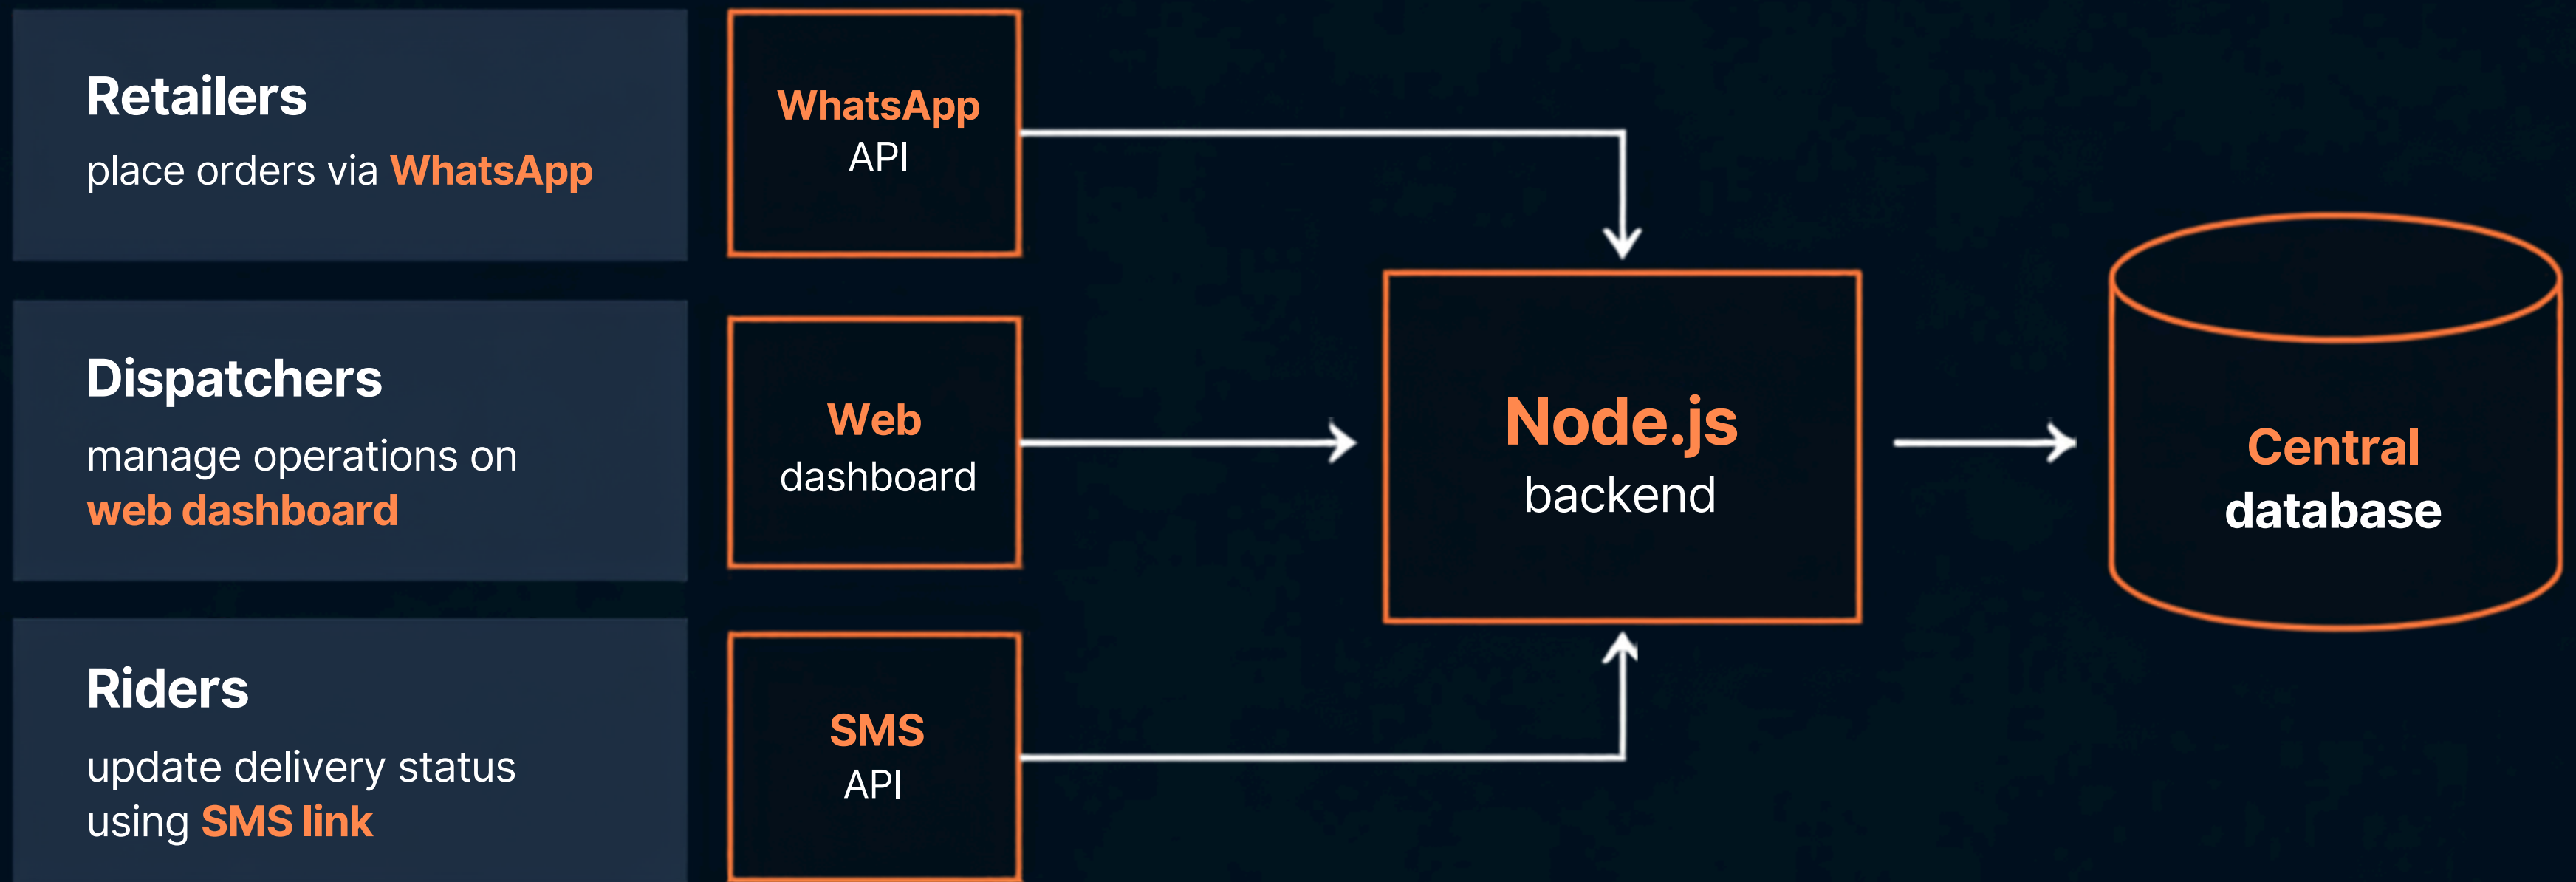

01 Retailer sends order via WhatsApp Business API

02 Dispatcher assigns rider through web dashboard

03 Rider updates delivery status using SMS link

Meeting Users Where They Are

A hybrid architecture built around Kenyan communication habits.

Strategic Design

Trade-offs

Prioritized adoption and speed over infrastructure cost and complexity.

TRADE-OFF	WHY WE ACCEPTED IT	FUTURE FIX
WhatsApp API Costs	Accepted for high user adoption	Future: optimize messaging volume
No Offline Mode for Riders	Accepted to accelerate MVP delivery	Future: develop offline-first app
Manual Dispatching	Accepted to avoid complex routing logic	Future: implement automated GPS routing

The Path Forward

A phased roadmap to scale and deliver more value.
